(413) 376-5034

56 South St.  
Drury MA, 01343

To Whom it May Concern:

I am a student at the Rochester Institute of Technology in the Computer Engineering program, graduating in May 2017. I am seeking a position creating embedded software or hardware, designing circuits, or systems engineering.

As a student, I have completed many personal projects that have shown me that I enjoy the creation of embedded systems. In particular, I have received great enjoyment designing PCBs, writing the software and getting a working device at the end of the journey. My Coop at SpaceX has shown me that I enjoy working in the aerospace industry, probably because I read a lot of science-fiction as a kid. My coop experience has proved that I am a hard worker that can adapt to new situations quickly and with ease.

Thank you for considering me for this position.

Sincerely yours,  
Christopher R. Culpepper
